# Chapter 1

## Hierarchical Index

### 1.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

org.example.customer_management.rest.BaseController . . . . .	5
org.example.customer_management.controller.CustomerController . . . . .	6
org.example.customer_management.entity.Customer . . . . .	6
org.example.customer_management.dto.CustomerDto . . . . .	7
org.example.customer_management.CustomerManagementApplication . . . . .	8
org.example.customer_management.request.CustomerRequest . . . . .	9
org.example.customer_management.response.CustomerResponse . . . . .	10
org.example.customer_management.service.CustomerService . . . . .	10
org.example.customer_management.service.impl.CustomerServiceImpl . . . . .	11
org.example.customer_management.enums.CustomerTier . . . . .	13
org.example.customer_management.rest.DataResponse< T > . . . . .	14
JpaRepository	
org.example.customer_management.repository.CustomerRepository . . . . .	8
org.example.customer_management.mapper.Mapper . . . . .	14
org.example.customer_management.enums.MessageCodes . . . . .	14
org.example.customer_management.rest.MetaResponse . . . . .	15
org.example.customer_management.rest.PageResponse< T > . . . . .	15
org.example.customer_management.rest.Response< T > . . . . .	16
org.example.customer_management.rest.ResponseBuilder . . . . .	16
org.example.customer_management.config.SwaggerConfig . . . . .	17
WebMvcConfigurer	
org.example.customer_management.config.WebConfig . . . . .	17

## Chapter 2

# Class Index

### 2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

<a href="#">org.example.customer_management.rest.BaseController</a>	5
<a href="#">org.example.customer_management.entity.Customer</a>	6
<a href="#">org.example.customer_management.controller.CustomerController</a>	6
<a href="#">org.example.customer_management.dto.CustomerDto</a>	7
<a href="#">org.example.customer_management.CustomerManagementApplication</a>	8
<a href="#">org.example.customer_management.repository.CustomerRepository</a>	8
<a href="#">org.example.customer_management.request.CustomerRequest</a>	9
<a href="#">org.example.customer_management.response.CustomerResponse</a>	10
<a href="#">org.example.customer_management.service.CustomerService</a>	10
<a href="#">org.example.customer_management.service.impl.CustomerServiceImpl</a>	11
<a href="#">org.example.customer_management.enums.CustomerTier</a>	13
<a href="#">org.example.customer_management.rest.DataResponse&lt; T &gt;</a>	14
<a href="#">org.example.customer_management.mapper.Mapper</a>	14
<a href="#">org.example.customer_management.enums.MessageCodes</a>	14
<a href="#">org.example.customer_management.rest.MetaResponse</a>	15
<a href="#">org.example.customer_management.rest.PageResponse&lt; T &gt;</a>	15
<a href="#">org.example.customer_management.rest.Response&lt; T &gt;</a>	16
<a href="#">org.example.customer_management.rest.ResponseBuilder</a>	16
<a href="#">org.example.customer_management.config.SwaggerConfig</a>	17
<a href="#">org.example.customer_management.config.WebConfig</a>	17

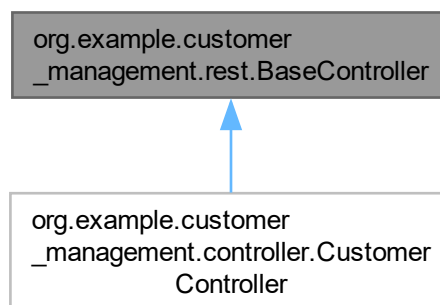

## Chapter 3

# Class Documentation

### 3.1 org.example.customer\_management.rest.BaseController Class Reference

Inheritance diagram for org.example.customer\_management.rest.BaseController:

#### Protected Member Functions

- `Response< MetaResponse > respond (MetaResponse metaResponse)`

#### 3.1.1 Detailed Description

Base controller class that provides common response handling methods. This class simplifies API response generation by using [ResponseBuilder](#).

Instead of manually calling [ResponseBuilder](#) in each controller, controllers can extend this class and use the `respond()` methods directly.

The documentation for this class was generated from the following file:

- `IdeaProjects/customer_management/src/main/java/org/example/customer_management/rest/BaseController.java`

## 3.2 org.example.customer\_management.entity.Customer Class Reference

### Public Member Functions

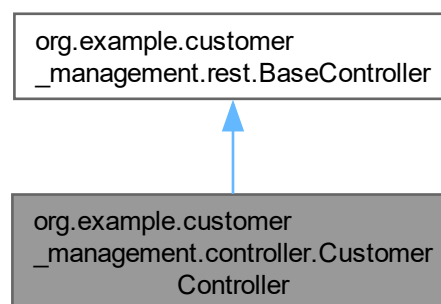

- **Customer** (UUID id, String name, String email, BigDecimal annualSpend, LocalDateTime lastPurchaseDate)
- **Customer** (String name, String email, BigDecimal annualSpend, LocalDateTime lastPurchaseDate)
- UUID **getId** ()
- void **setId** (UUID id)
- String **getName** ()
- void **setName** (@NotBlank(message="Name is required") String name)
- String **getEmail** ()
- void **setEmail** (@NotBlank(message="Email is required") @Email(message="Email should be valid") String email)
- BigDecimal **getAnnualSpend** ()
- void **setAnnualSpend** (BigDecimal annualSpend)
- LocalDateTime **getLastPurchaseDate** ()
- void **setLastPurchaseDate** (LocalDateTime lastPurchaseDate)

The documentation for this class was generated from the following file:

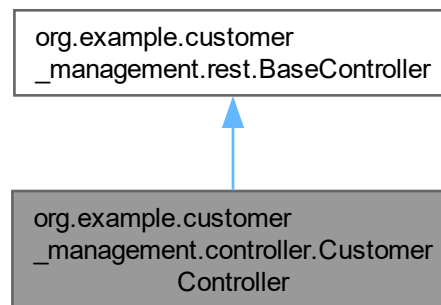

- IdeaProjects/customer\_management/src/main/java/org/example/customer\_management/entity/Customer.↔  
java

## 3.3 org.example.customer\_management.controller.CustomerController Class Reference

Inheritance diagram for org.example.customer\_management.controller.CustomerController:

Collaboration diagram for org.example.customer\_management.controller.CustomerController:

#### Public Member Functions

- **CustomerController** ([CustomerService](#) customerService)
- [Response](#)< [CustomerResponse](#) > **createCustomer** (@Valid @RequestBody [CustomerRequest](#) request)
- [Response](#)< [CustomerResponse](#) > **getCustomerById** (@PathVariable UUID id)
- [Response](#)< [CustomerResponse](#) > **getCustomerByEmail** (@RequestParam String email)
- [Response](#)< [CustomerResponse](#) > **getCustomerByName** (@RequestParam String name)
- [Response](#)< [CustomerResponse](#) > **updateCustomer** (@PathVariable UUID id, @Valid @RequestBody [CustomerRequest](#) request)
- [Response](#)< Void > **deleteCustomer** (@PathVariable UUID id)

#### Additional Inherited Members

#### Protected Member Functions inherited from [org.example.customer\\_management.rest.BaseController](#)

- [Response](#)< [MetaResponse](#) > **respond** ([MetaResponse](#) metaResponse)

The documentation for this class was generated from the following file:

- `IdeaProjects/customer_management/src/main/java/org/example/customer_management/controller/CustomerController.java`

## 3.4 org.example.customer\_management.dto.CustomerDto Class Reference

#### Public Member Functions

- **CustomerDto** (UUID id, String name, String email, BigDecimal annualSpend, LocalDateTime lastPurchaseDate, [CustomerTier](#) tier)

- **CustomerDto** (String invalidUser, String s, BigDecimal bigDecimal, LocalDateTime now)
- UUID **getId** ()
- void **setId** (UUID id)
- String **getName** ()
- void **setName** (String name)
- String **getEmail** ()
- void **setEmail** (String email)
- BigDecimal **getAnnualSpend** ()
- void **setAnnualSpend** (BigDecimal annualSpend)
- LocalDateTime **getLastPurchaseDate** ()
- void **setLastPurchaseDate** (LocalDateTime lastPurchaseDate)
- [CustomerTier](#) **getTier** ()
- void **setTier** ([CustomerTier](#) tier)

The documentation for this class was generated from the following file:

- IdeaProjects/customer\_management/src/main/java/org/example/customer\_management/dto/Customer↔  
Dto.java

### 3.5 org.example.customer\_management.CustomerManagement↔ Application Class Reference

#### Static Public Member Functions

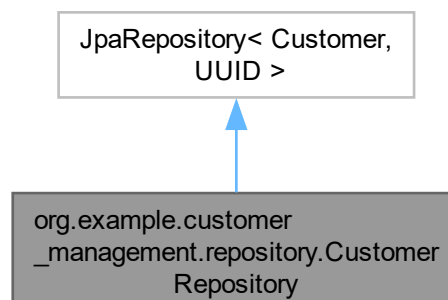

- static void **main** (String[] args)

The documentation for this class was generated from the following file:

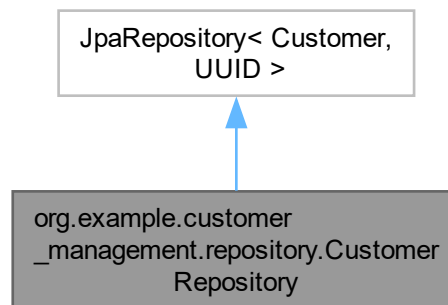

- IdeaProjects/customer\_management/src/main/java/org/example/customer\_management/Customer↔  
ManagementApplication.java

### 3.6 org.example.customer\_management.repository.CustomerRepository Interface Reference

Inheritance diagram for org.example.customer\_management.repository.CustomerRepository:

Collaboration diagram for org.example.customer\_management.repository.CustomerRepository:

#### Public Member Functions

- Optional< [Customer](#) > **findByEmail** (String email)
- Optional< [Customer](#) > **findByName** (String name)

The documentation for this interface was generated from the following file:

- `IdeaProjects/customer_management/src/main/java/org/example/customer_management/repository/CustomerRepository.java`

### 3.7 org.example.customer\_management.request.CustomerRequest Class Reference

#### Public Member Functions

- **CustomerRequest** (String name, String email, BigDecimal annualSpend, LocalDateTime lastPurchaseDate)
- String **getName** ()
- void **setName** (@NotBlank(message="Name is required") String name)
- String **getEmail** ()
- void **setEmail** (@NotBlank(message="Email is required") @Email(message="Email should be valid") String email)
- BigDecimal **getAnnualSpend** ()
- void **setAnnualSpend** (BigDecimal annualSpend)
- LocalDateTime **getLastPurchaseDate** ()
- void **setLastPurchaseDate** (LocalDateTime lastPurchaseDate)

The documentation for this class was generated from the following file:

- `IdeaProjects/customer_management/src/main/java/org/example/customer_management/request/CustomerRequest.java`

### 3.8 org.example.customer\_management.response.CustomerResponse Class Reference

#### Public Member Functions

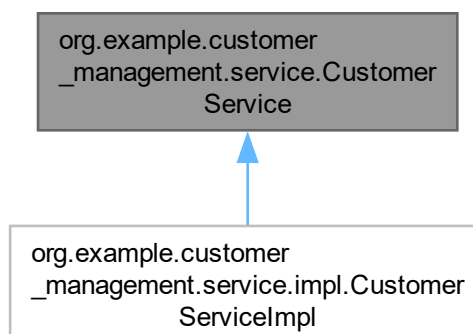

- **CustomerResponse** (UUID id, String name, String email, BigDecimal annualSpend, LocalDateTime lastPurchaseDate, [CustomerTier](#) tier)
- UUID **getId** ()
- void **setId** (UUID id)
- String **getName** ()
- void **setName** (String name)
- String **getEmail** ()
- void **setEmail** (String email)
- BigDecimal **getAnnualSpend** ()
- void **setAnnualSpend** (BigDecimal annualSpend)
- LocalDateTime **getLastPurchaseDate** ()
- void **setLastPurchaseDate** (LocalDateTime lastPurchaseDate)
- [CustomerTier](#) **getTier** ()
- void **setTier** ([CustomerTier](#) tier)

The documentation for this class was generated from the following file:

- IdeaProjects/customer\_management/src/main/java/org/example/customer\_management/response/CustomerResponse.java

### 3.9 org.example.customer\_management.service.CustomerService Interface Reference

Inheritance diagram for org.example.customer\_management.service.CustomerService:

### Public Member Functions

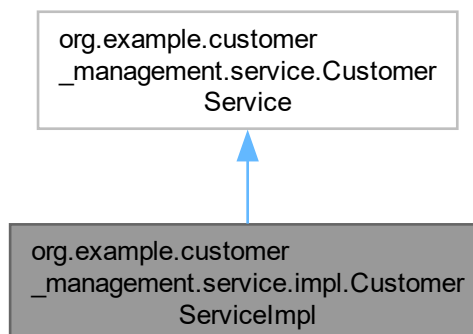

- [CustomerDto](#) **createCustomer** ([CustomerDto](#) dto)
- [CustomerDto](#) **getCustomerById** (UUID id)
- [CustomerDto](#) **getCustomerByEmail** (String email)
- [CustomerDto](#) **getCustomerByName** (String name)
- [CustomerDto](#) **updateCustomer** (UUID id, [CustomerDto](#) dto)
- void **deleteCustomer** (UUID id)

The documentation for this interface was generated from the following file:

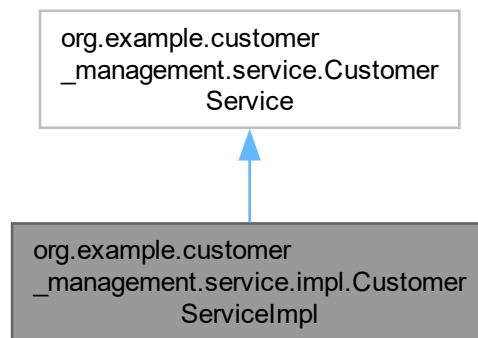

- `IdeaProjects/customer_management/src/main/java/org/example/customer_management/service/CustomerService.java`

## 3.10 org.example.customer\_management.service.impl.CustomerServiceImpl Class Reference

Inheritance diagram for org.example.customer\_management.service.impl.CustomerServiceImpl:

Collaboration diagram for `org.example.customer_management.service.impl.CustomerServiceImpl`:

### Public Member Functions

- **CustomerServiceImpl** ([CustomerRepository](#) customerRepository)
- [CustomerDto](#) **createCustomer** ([CustomerDto](#) dto)
- [CustomerDto](#) **getCustomerById** (UUID id)
- [CustomerDto](#) **getCustomerByEmail** (String email)
- [CustomerDto](#) **getCustomerByName** (String name)
- [CustomerDto](#) **updateCustomer** (UUID id, [CustomerDto](#) dto)
- void **deleteCustomer** (UUID id)

### Static Public Member Functions

- static [CustomerTier](#) **calculateTier** (BigDecimal spend, LocalDateTime lastPurchaseDate)

## 3.10.1 Member Function Documentation

### 3.10.1.1 createCustomer()

```
CustomerDto org.example.customer_management.service.impl.CustomerServiceImpl.createCustomer (
    CustomerDto dto) [inline]
```

Implements [org.example.customer\\_management.service.CustomerService](#).

### 3.10.1.2 deleteCustomer()

```
void org.example.customer_management.service.impl.CustomerServiceImpl.deleteCustomer (
    UUID id) [inline]
```

Implements [org.example.customer\\_management.service.CustomerService](#).

### 3.10.1.3 `getCustomerByEmail()`

```
CustomerDto org.example.customer_management.service.impl.CustomerServiceImpl.getCustomerBy↵  
Email (  
    String email) [inline]
```

Implements [org.example.customer\\_management.service.CustomerService](#).

### 3.10.1.4 `getCustomerById()`

```
CustomerDto org.example.customer_management.service.impl.CustomerServiceImpl.getCustomerById (  
    UUID id) [inline]
```

Implements [org.example.customer\\_management.service.CustomerService](#).

### 3.10.1.5 `getCustomerByName()`

```
CustomerDto org.example.customer_management.service.impl.CustomerServiceImpl.getCustomerByName  
(  
    String name) [inline]
```

Implements [org.example.customer\\_management.service.CustomerService](#).

### 3.10.1.6 `updateCustomer()`

```
CustomerDto org.example.customer_management.service.impl.CustomerServiceImpl.updateCustomer (  
    UUID id,  
    CustomerDto dto) [inline]
```

Implements [org.example.customer\\_management.service.CustomerService](#).

The documentation for this class was generated from the following file:

- `IdeaProjects/customer_management/src/main/java/org/example/customer_management/service/impl/Customer↵ServiceImpl.java`

## 3.11 org.example.customer\_management.enums.CustomerTier Enum Reference

### Public Attributes

- **SILVER**
- **GOLD**
- **PLATINUM**

The documentation for this enum was generated from the following file:

- `IdeaProjects/customer_management/src/main/java/org/example/customer_management/enums/Customer↵Tier.java`

## 3.12 org.example.customer\_management.rest.DataResponse< T > Class Template Reference

### Public Member Functions

- String **toString** ()

### 3.12.1 Detailed Description

Generic response model for handling lists of data items. Uses a generic type parameter <T> to support various data types. Implements a custom toString() method for better readability.

The documentation for this class was generated from the following file:

- IdeaProjects/customer\_management/src/main/java/org/example/customer\_management/rest/DataResponse.↔  
java

## 3.13 org.example.customer\_management.mapper.Mapper Class Reference

### Static Public Member Functions

- static [CustomerDto](#) **toDto** (@Valid [CustomerRequest](#) request)
- static [CustomerResponse](#) **toResponse** ([CustomerDto](#) dto)
- static [CustomerDto](#) **toDto** ([Customer](#) customer)
- static [Customer](#) **toEntity** ([CustomerDto](#) dto)

The documentation for this class was generated from the following file:

- IdeaProjects/customer\_management/src/main/java/org/example/customer\_management/mapper/Mapper.↔  
java

## 3.14 org.example.customer\_management.enums.MessageCodes Enum Reference

### Public Member Functions

- String **getCode** ()
- String **getMessage** ()
- **MessageCodes** (String code, String message)

### Public Attributes

- **SUCCESS** =("200", "general.success")
- **FAIL** =("500", "general.fail")
- **ENTITY\_ALREADY\_EXISTS** =("409", "general.entityAlreadyExists")
- **TOKEN\_EXPIRED** =("1025", "general.tokenExpired")

The documentation for this enum was generated from the following file:

- IdeaProjects/customer\_management/src/main/java/org/example/customer\_management/enums/MessageCodes.java↔

## 3.15 org.example.customer\_management.rest.MetaResponse Class Reference

### Static Public Member Functions

- static [MetaResponse](#) **of** (String code, String description)
- static [MetaResponse](#) **success** ()
- static [MetaResponse](#) **fail** (String description)

### 3.15.1 Detailed Description

[MetaResponse](#) model class that represents a standardized response structure. It includes a description and a response code. Provides utility methods for success and failure responses.

The documentation for this class was generated from the following file:

- IdeaProjects/customer\_management/src/main/java/org/example/customer\_management/rest/MetaResponse.java↔

## 3.16 org.example.customer\_management.rest.PageResponse< T > Class Template Reference

### Public Member Functions

- String **toString** ()

### 3.16.1 Detailed Description

Generic response model for paginated data. Uses a generic type parameter <T> to support various data types. Wraps data in a Page<T> structure to handle pagination efficiently. Implements a custom toString() method for better readability.

The documentation for this class was generated from the following file:

- IdeaProjects/customer\_management/src/main/java/org/example/customer\_management/rest/PageResponse.java↔

## 3.17 org.example.customer\_management.rest.Response< T > Class Template Reference

### Public Member Functions

- **Response** ([MetaResponse](#) meta)
- **Response** (T data)
- String **toString** ()

### 3.17.1 Detailed Description

Generic response model for API responses. This class encapsulates both the actual response data and metadata about the response.

#### Parameters

< T >	The type of the response data.
-------	--------------------------------

The documentation for this class was generated from the following file:

- `IdeaProjects/customer_management/src/main/java/org/example/customer_management/rest/Response.java`

## 3.18 org.example.customer\_management.rest.ResponseBuilder Class Reference

### Static Public Member Functions

- static< T > [Response](#)< [DataResponse](#)< T > > **build** (List< T > items)
- static< T > [Response](#)< [PageResponse](#)< T > > **build** (Page< T > items)
- static< T > [Response](#)< T > **build** (T item)
- static [Response](#)< [MetaResponse](#) > **build** ([MetaResponse](#) metaResponse)

### 3.18.1 Detailed Description

Utility class for building standardized API responses. Provides static methods to create [Response](#)<T> objects from different data structures.

The documentation for this class was generated from the following file:

- `IdeaProjects/customer_management/src/main/java/org/example/customer_management/rest/Response↵Builder.java`

## 3.19 org.example.customer\_management.config.SwaggerConfig Class Reference

### Public Member Functions

- OpenAPI **customOpenAPI** ()

The documentation for this class was generated from the following file:

- IdeaProjects/customer\_management/src/main/java/org/example/customer\_management/config/SwaggerConfig.java

## 3.20 org.example.customer\_management.config.WebConfig Class Reference

Inheritance diagram for org.example.customer\_management.config.WebConfig:

Collaboration diagram for org.example.customer\_management.config.WebConfig:

**Public Member Functions**

- void **addCorsMappings** (CorsRegistry registry)

The documentation for this class was generated from the following file:

- IdeaProjects/customer\_management/src/main/java/org/example/customer\_management/config/Web↵  
Config.java
